

Yash Santosh Maurya

FRONTEND & FULL STACK DEVELOPER — REACT / NUXT / NODE

+91 79722 73012 | yashmaurya2109@gmail.com | github.com/yashmaurya321-crypto | [Portfolio](#)

SUMMARY

Frontend-leaning Full Stack Developer currently building production features at SpectroNOVA with Nuxt, TypeScript and Supabase, on top of an earlier foundation in the MERN stack and React Native. Comfortable owning a feature end to end — interface, API, data model and deployment — which means fewer handoffs and faster shipping. Has shipped reusable UI systems, data-heavy dashboards, and several independent full-stack and Web3 projects (Solidity/Ethereum). Open to frontend and full-stack roles, freelance builds and long-term product teams.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Java, Python, HTML5, CSS3, Solidity
Frontend	React.js, Nuxt, Vue 3, React Native, Responsive Design, Accessibility, UI Animation
Backend	Node.js, Express.js, REST APIs, MongoDB, Supabase, PostgreSQL, Row Level Security
Blockchain	Solidity, Hardhat, Ethers.js v6, OpenZeppelin, ERC-20, MetaMask
Tools & Practices	Git, GitHub, Docker, Figma, Cloudinary, Razorpay, Nodemailer, Performance Tuning, DSA

EXPERIENCE

Frontend Developer — SpectroNOVA Full-time · 2026 – Present

- Promoted from Junior Frontend Developer; independently develop complete frontend features end to end.
- Build scalable UI architecture for the product and improve user experience across key flows.
- Work closely with designers and backend developers to deliver production-ready applications.

Junior Frontend Developer — SpectroNOVA Full-time · 2025 – 2026

- Developed production features used by real customers, using Nuxt.js and TypeScript.
- Built reusable UI components that were adopted across the wider product.
- Created responsive dashboards for data-heavy screens and worked with the backend team on API contracts.
- Improved application performance and fixed critical bugs.

React Native Developer Intern — MNCLR Remote · 3 months, 2024

- Contributed to both React Native and MERN stack projects, developing mobile features and reusable UI components.
- Built and maintained full-stack web application features across a Diwali shopping app, an admin dashboard, a chess game app and a location tracking app.
- Integrated REST APIs, fixed bugs and implemented new features across frontend and backend, collaborating with the team via Git.
- Also designed website layouts, app interfaces and logos in Figma, and took on HR/coordination tasks.

React Native Development Intern — Geneus Solution Remote · 2 months, 2024

- Developed a full-stack subscription-based mobile application using React Native, Express.js and MongoDB.
- Integrated the Razorpay payment gateway for secure subscription payments and transaction handling.
- Designed and implemented REST APIs for authentication, subscriptions and application data.
- Built reusable React Native components and optimized app performance for a smoother user experience.

PROJECTS

Taskflow — Task Management SaaS

Nuxt 4 · Vue 3 · TypeScript · Supabase · PostgreSQL · RLS · Nodemailer

- Multi-tenant task management SaaS for small teams, with workspace-based permissions and email invitations.
- Row Level Security in Postgres/Supabase enforcing per-workspace data isolation; a collaborative To Do → Ongoing → Done board.
- Subscription-based access control that automatically locks expired Premium workspaces without deleting their data.

Learning Management SaaS

MERN Stack · Redux · JWT · Bcrypt · Cloudinary · Razorpay

- Full course platform with secure authentication, course search/filtering, and Razorpay-backed purchases.
- Student dashboard for progress tracking; admin dashboard for course creation, management and user insights.
- JWT authentication with bcrypt password hashing; media and profile uploads handled through Cloudinary.
- Live: lms-6aiv.onrender.com · Code: [Frontend](#)

AI Budget Tracker

HTML · CSS · JavaScript

- AI-powered personal finance app for budgeting, expense tracking, and AI-generated spending insights and predictions.
- Implemented secure authentication and personalized financial recommendations.
- Code: [GitHub](#)

Blockchain ERC-20 Token Dashboard

React.js · Solidity · Hardhat · Ethers.js v6 · OpenZeppelin · Ethereum

- Built a blockchain dashboard for managing an ERC-20 token, with smart contracts on OpenZeppelin's audited implementation.
- Wallet connection, real-time balance tracking, transfers, transaction history and holder management.
- Code: github.com/yashmaurya321-crypto/YashToken

CrowdFunding DApp

React.js · Solidity · Hardhat · Ethers.js · OpenZeppelin · Ethereum

- Decentralized crowdfunding platform where users securely fund campaigns via MetaMask and Ethereum.
- Solidity smart contracts with owner-based campaign creation for transparent, trustless fundraising.
- Code: github.com/yashmaurya321-crypto/CroudFunding

Blog Application

React · React Router · Node.js · Express.js · MongoDB · Bootstrap

- Full-featured blog app with JWT auth, category-based sorting, likes, comments, search and a user dashboard.
- Users can write and manage their own posts and follow favourite writers.

Portfolio Website

HTML · CSS · JavaScript

- Cinematic-style personal site inspired by media and film distribution, with premium UI/UX, smooth animations and interactive, responsive sections.
- Live: yashmaurya321-crypto.github.io/Yash-Maurya-Portfolio

EDUCATION

QUALIFICATION	INSTITUTE	UNIVERSITY / BOARD	SCORE
BCA — Second Year	Tilak Maharashtra Vidyapith	Pune University	83%
BCA — First Year	Tilak Maharashtra Vidyapith	Pune University	71%
HSC (12th)	Expert College	Mumbai	85.00%
SSC (10th)	Expert International High School	Mumbai	71.40%

CERTIFICATIONS

- MERN Certificate — SkillUp
- React.js Certificate — Great Learning
- JavaScript (Basic) — HackerRank
- Internship Completion Certificate — Geneus Solution

ADDITIONAL

Strengths

- Problem solving and creative thinking
- Self-motivated, quick to pick up new tools
- Works well under pressure and to deadlines
- Clear written and verbal communication

Details

- Languages: English, Hindi
- Date of Birth: 21 September 2004
- Location: India (open to remote)
